

# FN-30-OKL

## CALIFORNIA PROPOSITION 65 WARNING

**WARNING:** This product can expose you to chemicals, including titanium dioxide, which is known in the state of California to cause cancer and lithium Carbonate, which is known in the state of California to cause birth defects or other reproductive harm. For more information go to: [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

**Note:** Before stacking the logs, do so without the burner in operation and wait for all component pieces to be completely cool from any testing of the burner. Always wear protective gloves when handling the gas logs or burner components.

**IMPORTANT:** In the event a replacement log is needed, please reference the log breakdown below to ensure the correct log is ordered. The total length of each log is noted next to the model number at the end of these instructions for identifying each log accurately.

**Note:** The referenced placement of the smaller top logs can be changed to fit the preferences of the homeowner. Should this be desired, take care when restacking to allow passageways for the flame to move through the top log set. Stacking too closely together and or placing directly in the vacant space between the bottom two logs can smother the flame potentially creating venting problems and excess sooting.

**WARNING: This is a vented set of gas log whose exhaust must be properly vented. Only use this vented gas log set in a fully functioning fireplace and chimney in good repair.**
